Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Applicant's Request For Consideration After Final Action, dated July 22, 2004, is acknowledged.

Upon further review of pending claims, which include claims 34-41 that were added in Paper No. 10, the Examiner noted that they are directed to inventions in two different statutory categories (see MPEP 806.05(e)). The claims are therefore further restrictable, in addition to the previous election requirement based on plurality of species (see 8/5/02 Office Action).

Accordingly, the 4/22/04 Final Office Action is withdrawn and replaced by this Office Action. The previous withdrawal from consideration of claims 34-41 is also rescinded. The restriction based on species in the 8/5/02 Office Action is maintained. We regret any inconvenience to the Applicant.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1, 4-12, and 36-41 drawn to an **apparatus** (servicing platform for a nuclear reactor), classified in class 376, subclass 260.
 - II. Claims 24-35, drawn to a **process** (servicing a nuclear reactor during an outage), classified in class 376, subclass 263.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be

Art Unit: 3641

practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the apparatus can be used as a servicing platform in a wet storage facility for spent nuclear fuel.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
